

Alper Arıçay

SOFTWARE ENGINEER

İstanbul, Turkey | 0535 375 6239 |
alperaricay@gmail.com

Professional Summary

Experienced Software Engineer with a strong background in game development and cybersecurity. Proven expertise in developing and optimizing mobile games that have achieved top-chart rankings. Skilled in Agile and Scrum practices, including leading and participating in sprints, stand-ups, and retrospectives. Demonstrated track record of delivering high-quality projects on time through effective collaboration with cross-functional teams.

Experience

Bla Bla Games | Co-Founder, Game Developer

2025-2026

Co-founded a game studio developing scalable multiplayer and party game experiences, leading end-to-end development using Unity and C#. Architect and implement core gameplay systems, reusable mechanics, and modular feature structures with a strong focus on performance, maintainability, and user engagement. Actively contribute to game design decisions, prototype new mechanics, and iterate based on testing and player feedback.

Umay Games | Co-Founder, Game Developer

2022-2023

Led mobile game development initiatives from concept to launch, contributing directly to gameplay programming, feature implementation, and live optimization using Unity and C#. Developed and shipped over 25 mobile games, focusing on rapid prototyping, polished user experiences, and performance optimization across devices. Collaborated with publishing partners and internal teams to refine game mechanics, improve retention metrics, and implement iterative feature updates. Oversaw structured sprint planning, version control processes (Git), and cross-functional communication to ensure consistent delivery of high-quality products.

Teos Game Studio | Senior Game Developer

2021-2022

Designed and implemented gameplay systems and new features using Unity and C#, ensuring clean architecture and scalable code practices. Collaborated closely with designers and artists to transform gameplay concepts into engaging player experiences, contributing to both technical implementation and feature design. Optimized game performance, memory usage, and gameplay loops to improve player retention and overall product stability.

Panteon | Game Development Team Lead

2021

Led a cross-functional development team in building and refining mobile game features, ensuring alignment between technical execution and game design vision. Contributed hands-on to Unity-based gameplay systems while mentoring developers and promoting clean coding standards.

Bizkit Games | Game Developer

2020-2021

Managed the design and sharing processes of the produced content. Coordinated the team in the visual design processes. Organized meetings, presentations, and events by keeping in touch with forum members to increase the user experience.

OID Event & Management | Software Engineer, Game Developer

2018-2020

Developed interactive software solutions and real-time applications, strengthening expertise in C# programming, system architecture, and structured development practices. Contributed to feature implementation, debugging, and performance improvements within production environments.

Education

Bahçeşehir University	2014-2021
Major: Software Engineering	
Maltepe Anatolian High School	2010-2014

Skills & Abilities

- C#, C++
- Unity Engine (2D/3D)
- Mobile Optimization & Performance Profiling
- SQL
- ASP .Net Core
- Microsoft Azure
- Version Control (Git)
- Reverse Engineering
- Cross-Functional Team Leadership
- Agile / Scrum methodologies
- Jira / Trello
- Clean Code Practices
- OOP & Design Patterns
- Analytical Thinking
- Iterative Development

Certificates

TryHackMe	
Jr. Penetration Tester (THM-ZEYIWCVSZL)	2023
Pre Security (THM-65UDDROL2Q)	2023
Introduction to cyber security (THM-ICDNRIMXEE)	2023
C & SYSTEM PROGRAMMERS ASSOCIATION	
C# Programming Language	2021
Introduction To Programming	2020

Languages

English (Advanced)
Turkish (Native)
